Miscellaneous

How will disputes and grievances be resolved?

In the event of disputes between individual team members, one of the remaining uninvolved members will be asked to make the final decision. If that is not possible, a meeting will be arranged with Dr. Teslenko.

How will performances be evaluated?

Performance will be considered sufficient if assignments are completed on time to an acceptable level of quality according to the marking rubric.

What technology will be used?

The final report will be written in L^AT_EX, preliminary work and communications will take place on privately owned servers to avoid unnecessary security breaches.

How will the findings be distributed?

Once the findings are ready for publication, they will be posted to a public Github repository as a PDF as well as the original L^AT_EX source code under a Creative Commons License.
